Full Stack Web Developer with a fresh outlook on the field and motivation to continue learning. Motivated employee with the ability to efficiently multitask, maintain customer relations and exceed business objectives. Positive and upbeat team player with exceptional clerical knowledge and hard working mentality.

Skills

- Exceptional word processor, typing at 100+ WPM with few errors.
- Front End Development - HTML, CSS, Javascript, and React.
- Back End Development - Node.js, Express.js, MongoDB, and MySQL with Sequelize as an ORM.
- Experience building applications following an MVC paradigm.
- Always willing to put forward effort to learn new skills and improve existing ones.

Education

2021-01 -
Current

Full Stack Coding Bootcamp: Full Stack Web Development

University of Utah - Salt Lake City

- Attended a 24 week full stack web development coding bootcamp.
- Created multiple applications following instructional guidelines and deployed them to GitHub.
- Collaborated on 2 (3rd coming soon) group projects with fellow classmates to dictate work and simulate working together with future co-workers.

Projects

- First collaborative project: **Pet Adoption Quiz**

I led the team and helped disperse work amongst us all. I also helped oversee the completion of each feature and helped where help was needed. I worked on fetch requests in Javascript from two different web API's to display images on the quiz page. I

also helped style the quiz page using Bulma. This project is deployed at <https://avamariee.github.io/pet-adoption-quiz/> and the repository is at <https://github.com/avamariee/pet-adoption-quiz>.

- Second collaborative project: **Just My Type**

I worked in a team with two other developers to create this game. I designed the front-end using Bulma and also helped with a lot of the back-end RESTful API's. I also helped the team work through Github merge conflicts. This project is deployed at <https://stark-depths-18071.herokuapp.com/> and the repository is at <https://github.com/Amado-bot/just-my-type>.

- Solo project: **Your Favorite Tech Blog**

I created this website from scratch while following the MVC paradigm. This is a mock tech-blog website where users can log in, and create posts. Users can also edit and delete their own posts using the dashboard. The HTML for this website is deployed using Handlebars. The website itself is deployed using Heroku at <https://pacific-escarpment-48422.herokuapp.com/>, and the repository is at <https://github.com/avamariee/MVC-challenge>.

- Solo Project: **Work Day Scheduler**

This is an application I created using Bootstrap, jQuery, Moment.js and Javascript. The application uses your computer's local time to highlight each section a certain color of the application depending on the time of day. The website itself is deployed by Github Pages at <https://avamariee.github.io/work-day-scheduler/>, and the repository is at <https://github.com/avamariee/work-day-scheduler>.

Work History

2016-05 -
Current

Office Administrator

Pilot Thomas Logistics, North Salt Lake, UT

- Producing high-quality documents and spreadsheets for internal and customer-facing needs using Word and Excel.
- Improved warehouse inventory ordering by creating excel spreadsheets to track item codes and inventory trends.
- Tracking \$1,000,000+ worth of product across multiple warehouses and ensuring sufficient levels of product to fulfill orders in a timely manner.
- Generating and submitting invoices accurately based on deliveries that were made to customers within one business day of delivery.
- Assisting the dispatcher by ensuring delivery tickets are created quickly, accurately and with any important delivery related information made visible to the driver.
- Developed exceptional client relationships, with many customers preferring to work with myself directly instead of being assisted by a salesperson.

2017-07 -
2020-07

Captioning Agent

Captioncall, Taylorsville, UT

- Editing and reviewing live captions for clarity, grammar and spelling.
- Maintaining customer privacy by keeping all information confidential.
- Actively submitting bug reports with thorough descriptions to the IT department to help improve captioning software.

2014-09 -
2016-06

Data Conversion Operator

USPS, Salt Lake City, UT

- Prepared and sorted mail and packages for shipping via mail sorting machine.
- Observed safe equipment operation and practices during each work shift.
- Developed professional working relationships with other employees by using effective communication and listening skills.
- Reviewed digital images of mail pieces and ensured timely delivery.

2012-09 -
2014-09

Customer Service Representative

F.Y.E, Taylorsville, UT

- Maintained customer satisfaction by going above and beyond while addressing customer needs and resolving concerns.
- Quickly and accurately counted drawers at start and end of each shift.
- Restocked, arranged and organized merchandise in front lanes to drive product sales.
- Used a POS system to enter orders, process payments, and issue receipts.
